Bring STEM to your classroom today!

“Logics Academy is very student focused, encouraging collaboration and innovation. They prepare an engaging and positive environment where students are empowered to create from their own inquiries. Working in tandem with teachers, Logics provides students with an opportunity to imagine their futures in a variety of STEM careers.”

~ Luke Persaud, STEM Learning Coach, Toronto District School Board

“Excellent staff - engaging, knowledgeable. The students really like the staff, and I think they are excellent teachers.”

~ Rose Bastien, Intermediate Teacher,
Hudson College Private School

WHO WE ARE

Since 2011, Logics Academy has inspired elementary and secondary students as well as teachers to explore and innovate science, technology, engineering, arts and mathematics through experiential, hands-on Robotics & Aerospace workshops. Our workshops parallel the Ministry of Education Curriculum and are delivered by certified teachers, scientists and engineers.
