Coding Quest

THE LEARNING PARTNERSHIP

Powered by Logics Academy

Learn a fun and easy way to teach coding for Grades 1 - 8.
No previous coding experience necessary.

WHY CODING QUEST PROGRAM?

- Adaptable and easily integrates into existing lesson plans

- Access to a dashboard full of resources including well-organized lesson plans and activities tied to curriculum

- Includes FREE live, virtual onboarding training sessions

- Teach in-class, virtual, or in a blended learning environment

CODING QUEST GRADES 1 – 3

- Explore, create and build coding skills using a virtual 3D environment and Dash the robot in Dash's Neighbourhood

- Includes a free one-year subscription ($550 value) to Class Connect, a class management system to track student success

- Culminates in a live virtual showcase

CODING QUEST GRADES 4 – 8

- Learn to code a video game or story following a simplified engineering process using block-based coding (Scratch)

- Learn how to use Scratch Studios as a means for students to share their projects with the class virtually and learn from one another

- Culminates in a live virtual showcase
